02

IT Security Management

03

Software Development

04

Software Development **Services**

Custom Software Development

Tailored software solutions optimizing efficiency and addressing unique business challenges.

Web Application Development

Dynamic web applications enhancing user experience and business functionality.

Mobile Application Development

Robust mobile apps for seamless engagement on Android and IOS platforms.

Enterprise Software Development

Scalable enterprise solutions integrating processes to boost productivity.

E-commerce Development

Secure e-commerce platforms with payment integration and customer analytics.

DevOps Services

Streamlined development lifecycle with continuous integration and deployment.

AI and Machine Learning Solutions

AI-driven automation and insights enhancing business decision-making.

Cybersecurity **Services**

- **Vulnerability Assessments / Penetration Testing:**

Secure your end applications, systems, networks and cloud infrastructure by conducting comprehensive VA/PT. Uncover standard, well-known vulnerabilities, as well as application- and environment-specific vulnerabilities by leveraging our expertise over industry-standard and in-house tools and methodologies.

- **Managed Security Operations:**

Offload your protection requirements to us. We can set up and monitor your security infrastructure using tools such as SIEM, NGAV/EDR/XDR, HIDS, NIDS, DLP, and Vulnerability Management. We respond to incidents as they happen by setting up automated alerts and mitigations.

OUR PORTFOLIO

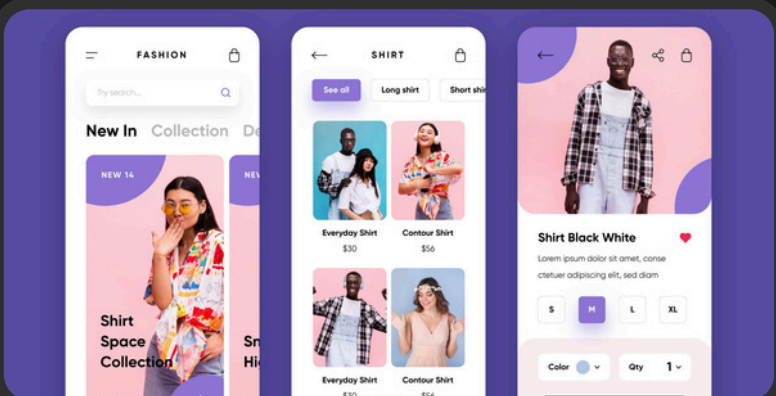

Supercharged
Enterprise Software

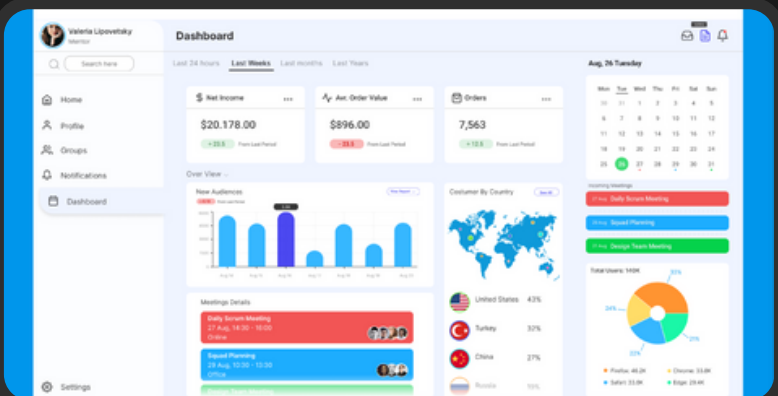

We specialize in developing secure and user-friendly software tailored to meet your unique business needs. With our expertise, creativity, and commitment, we deliver reliable solutions that align with your goals and ensure high-quality performance.

Anna University - panruti Campus, Cuddalore, Tamil Nadu on 27th March 2025

Why Razz Security is the best

Our milestone

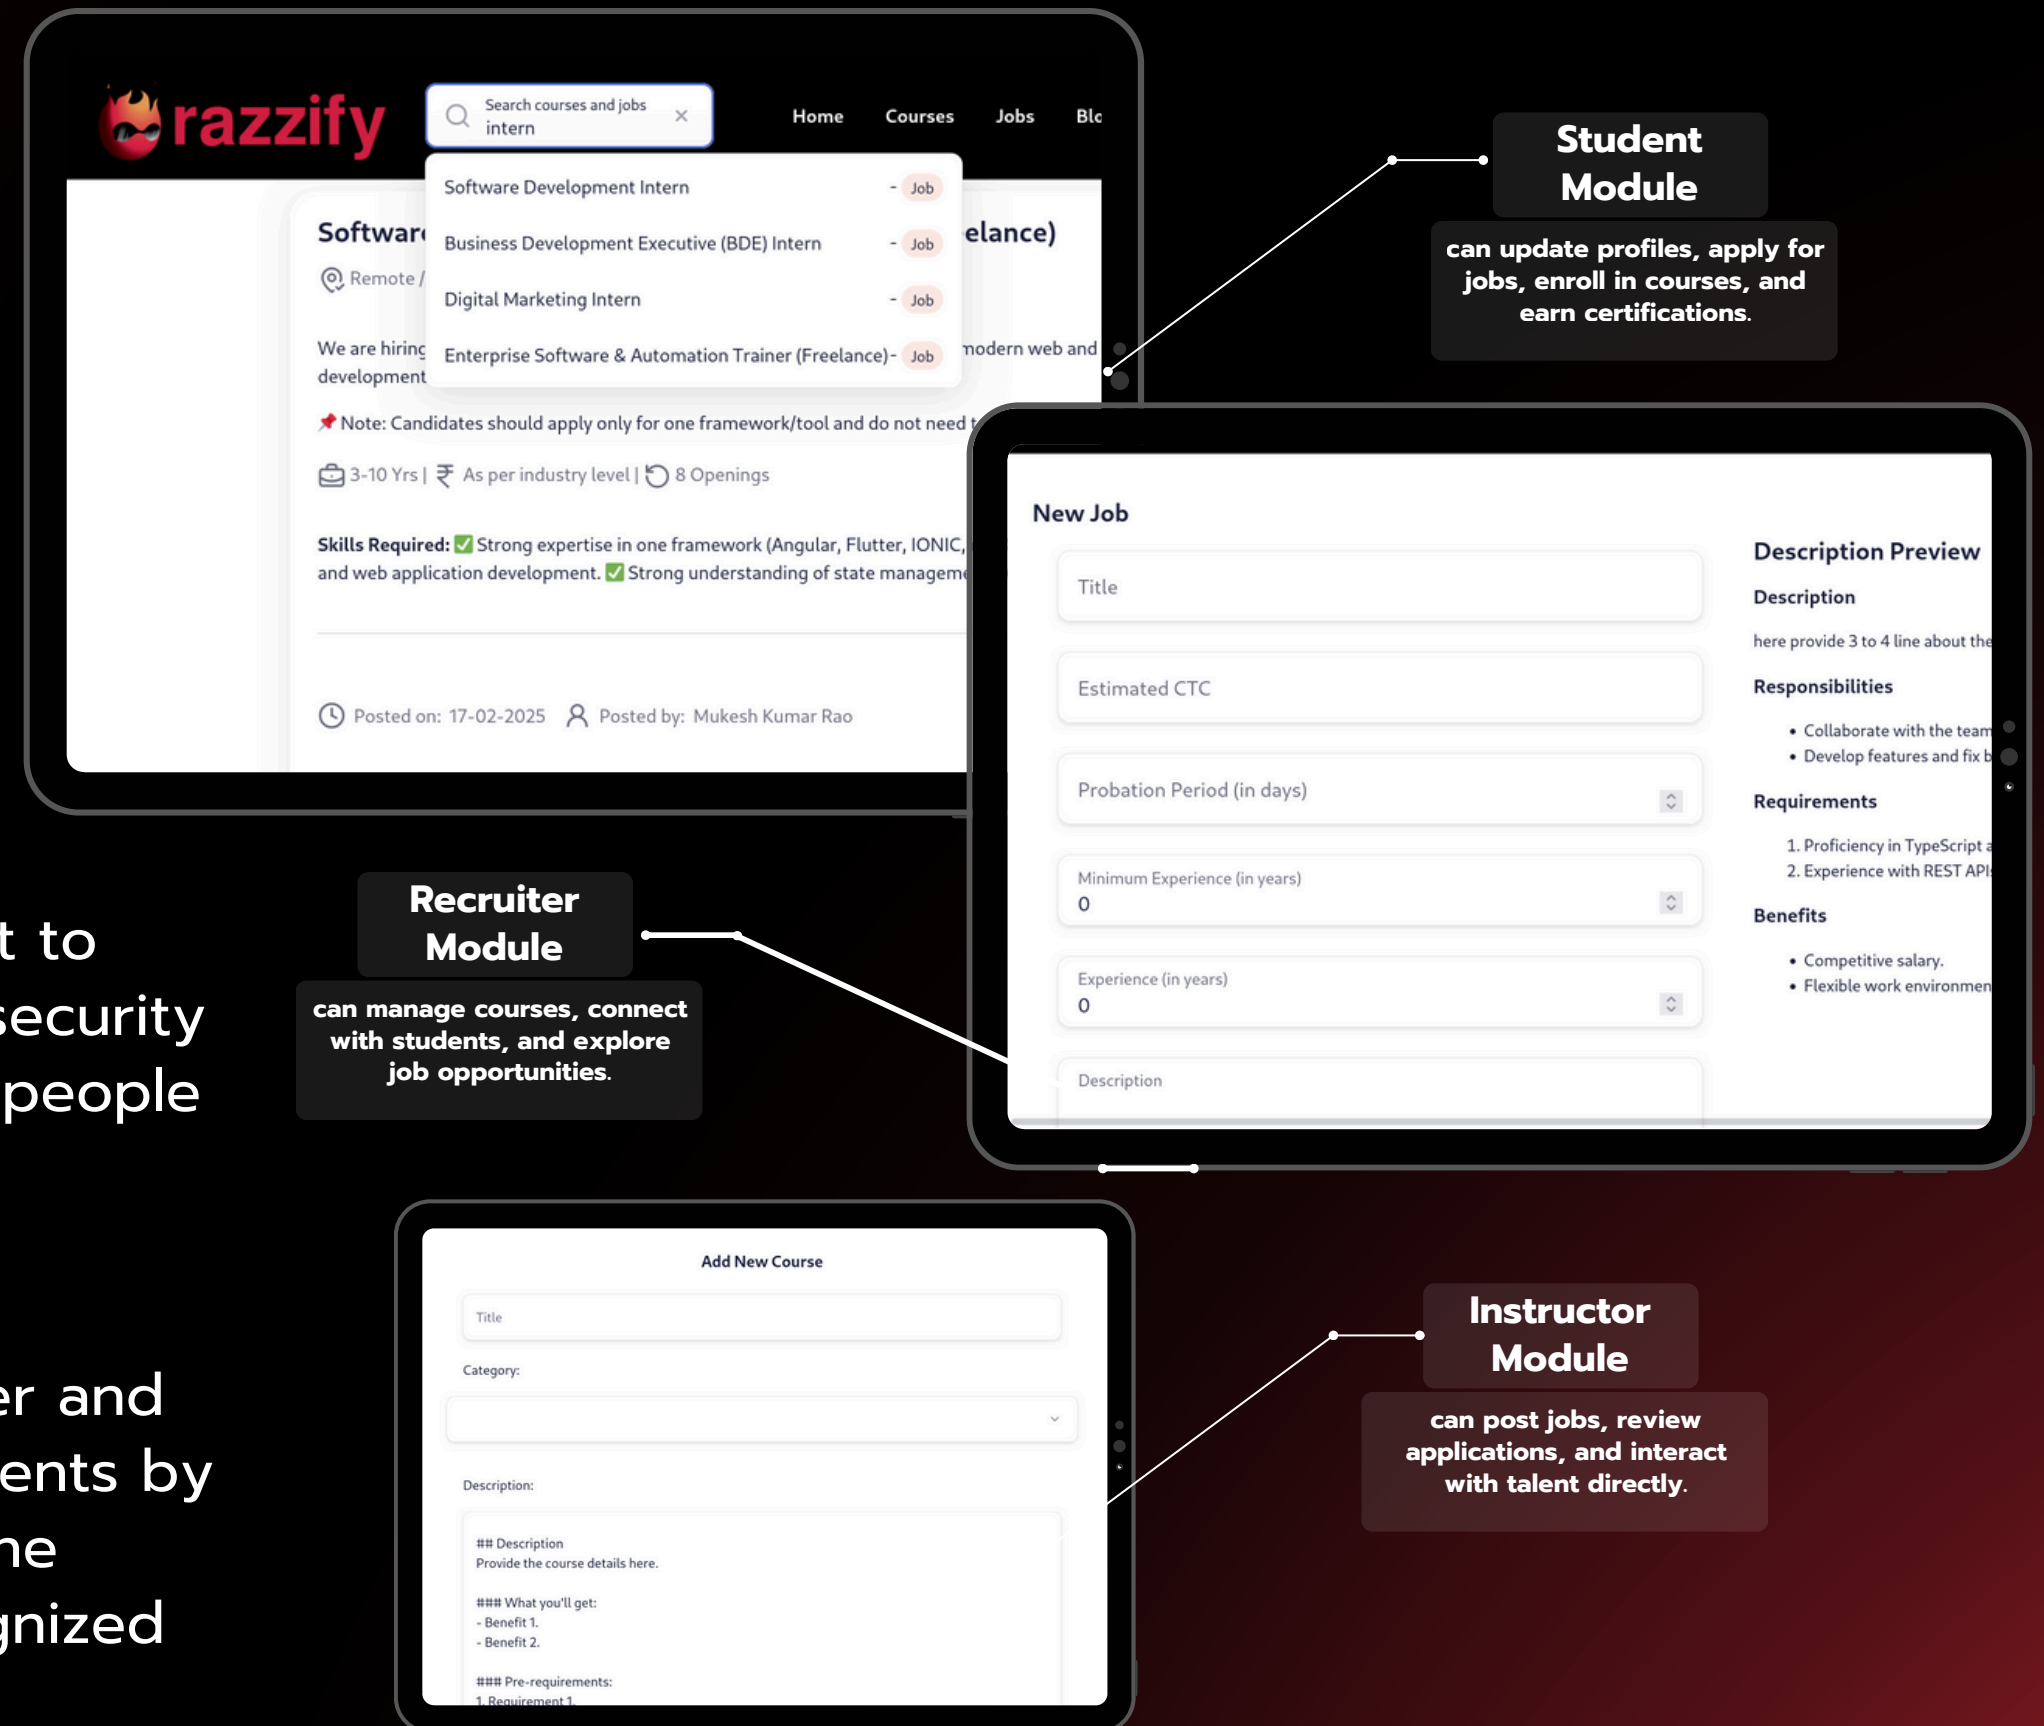

Live

Software Product

Razzify (powered by Razz Security) was built to simplify learning, teaching, and hiring in cybersecurity by solving one core problem: finding the right people shouldn't be hard.

We provide a seamless platform that connects professionals with the right opportunities, faster and smarter. Users can showcase their skills and talents by solving real-world challenges, making Razzify the platform where cybersecurity talent gets recognized and hired.

Software Product

Secure Pilot (powered by Razz Security)

is a next-generation cybersecurity platform designed to deliver security on autopilot.

With 24/7 protection, it ensures real-time detection, prevention, and response across multiple sectors including Electric Vehicles (EVs), IT infrastructure, Cloud services, Web and Mobile applications, AI systems, and Blockchain platforms.
